

## Technical Page

Proposal Type: Short  
 General Category: Astronomy  
 Observation Category: Galactic  
 Total Time Requested: 10 Hours  
 Minimum Useful Time: 1:00

**Proposal Title:** Introduce UTB students to pulsar observing at Arecibo

**ABSTRACT:**

In first instance, a short introductory session for students, to be observed by them remotely. This is to be followed by a visit to the Observatory to confirm three pulsars they have founs in pALFA data. There may be subsequent, pALFA related followup observing.

Name	Institution	E-mail	Phone	Student
Fredrick Jenet	University of Texas at Brownsville	merlyn@alum.mit.edu	626 524 0518	no

### Remote Observing Request

- Observer will travel to AO
- Remote Observing
- In Absentia (instructions to operator)

### Instrument Setup

L-wide

### Atmospheric Observation Instruments:

**Special Equipment or setup:** none

### RFI Considerations

### Frequency Ranges Planned

This proposal requires coordination with Punta Salinas radar within the band 1222-1381 MHz..

This proposal requires coordination with GPS L3 at 1381 MHz.
